IS OUR SERVICE."**

## THE SGW ULTIMATE K9 SYSTEM: SPECIFICALLY ENGINEERED FOR PETS.

Synthetic Grass Warehouse features state-of-the-art turf products just for pets! Engineered with a soft and durable polyethylene synthetic fiber, your pet can still enjoy all the benefits that natural grass has to offer while virtually eliminating all the hard work and labor required to maintain your lawn.

With our Pet Ultimate K-9 System®, your Pet Environment will have a lush, green, realistic look and feeling all year long. Our state-of-the-art Durafill® technology works to prevent the build-up of bacteria spores that can occur through animal urine as well as other external elements. It also provides a stain-free environment that is safe for your dog as well as for the whole family. Durafill® will work to keep the synthetic fibers standing upright, maintain ballast and allow rapid blade recovery throughout your lawn. You can also say 'goodbye' to yellow spots or paw tracks on your lawn. Most importantly, your family and pets will not be subjected to skin contact or ingestion of harmful pesticides! Cleaning is simple with readily available household products.

### OUR ULTIMATE K9 SYSTEM IS GREAT FOR:

- Backyards
- Animal Shelters
- Animal Hospitals
- Pet Hotels
- Dog Parks
- Pet Shows

“The first antimicrobial k-9 system...permeable, durable, sanitary and environmentally sound!”

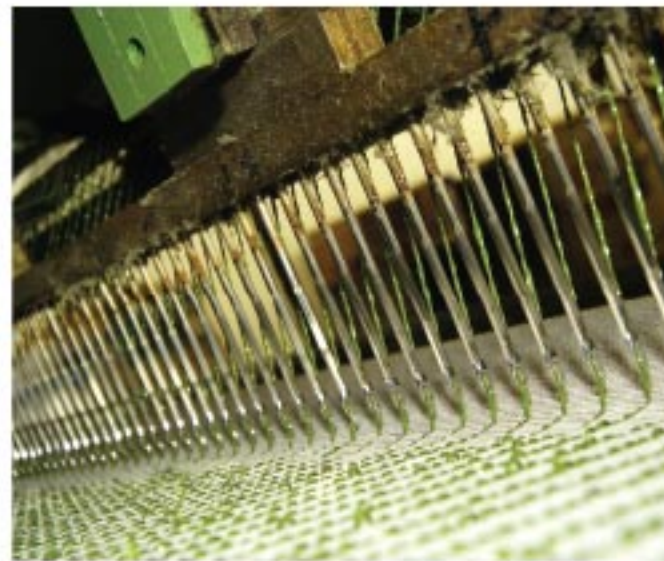

# WHY BUY FROM SGW?

## SYNTHETIC LANDSCAPE GRASS...BETTER THAN THE ORIGINAL.

Choosing synthetic grass is a choice to conserve precious water resource of throughout urban and rural areas, including schools, sports fields, parks and our fastest growing segment- commercial applications.

By choosing SGW, you can be assured that you chose the most reputable company that completely backs every product sold. We have a top rated customer support system and will commit to your every need without delay. SGW will provide you with the care you deserve.

# LANDSCAPE GRASS

## LIFE-LIKE APPEARANCE OF NATURAL GRASS.

Never before has synthetic grass so closely resemble the life-like appearance of natural grass!

SGW's introduction of modern synthetic grass products offers beautiful, economical and prudent commercial options for all types of landscapes.

Today's fast-paced lifestyle makes it nearly impossible to spend the necessary time to maintain natural grass, keeping it beautiful and manicured. Even with the installation of an irrigation system, natural grass is very fragile and can literally die overnight. Many lawns have too much shade, improper soil conditions and drainage issues along with child and pet traffic, elevation and landscape challenges that simply make it too difficult to access lawn and maintenance equipment.

SGW will assist you in developing a practical and beautiful landscape design. Our products will reduce your daily maintenance and convert your lawn and/or backyard into a fun entertainment area. Your home is your most important asset and your lawn and landscape provide the framework around your home. Make your home and lawn a masterpiece with SGW products!

## PLAYCREATION BY SGW

### A GREEN & CLEAN PLAYGROUND PROGRAM

SGW's line of synthetic grass playground products is engineered to provide a safe, durable, and forgiving surface for the little ones that still looks natural. Our products exceed industry standards and feature a contemporary surface that children love to play on.

Safety is our number one priority, and with advent of SGW's life-like synthetic grass, playgrounds can have a natural appearance while remaining truly safe for children to play on. Put the natural look back into your playground safety surface and retain all necessary safety features with SGW products. Create a clean, safe, allergen and insect-free environment for our children.

# FROM TEE TO GREEN

## WITH HIGH QUALITY GOLF PRODUCTS

SGW has engineered a complete line of professional-grade synthetic golf products. A true practice environment for total game improvement requires more than just a putting green. Every golfer is thrilled when they feel the ball "compress." Synthetic Grass Warehouse is the innovator of "HCT" High Compression Technology."

This manufacturing process utilizes very dense thatch interwoven with a BC stitching pattern to make the club head "bounce" through the ball while producing true club feedback. This technology is used with both High Density and Tee Line HCT. The feel and lift that is felt around the fringe is remarkable. Having a fringe that simulates course like conditions is a must. Our "High Density" brings that natural feel and look to your private practice environment. "High Density" also may be used side-by-side in the tee box area to simulate fairway conditions which is an industry first! Our Tee Line HCT is the most durable product in the industry. This amazing product provides true feel and natural ball lift with any club while allowing you to insert a natural golf tee, unlike the limitations of the short "rubber tube" tee.

## TIGERCOOL®

### A BREAKTHROUGH IN THE INDUSTRY!

Synthetic Grass Warehouse is proud to introduce TigerCool®, the latest in artificial turf cooling technology.

Created by Tencate, a worldwide innovator of space-age yarns for NASA and Boeing, TigerCool® yarns are engineered with heat reflective color pigments and advanced U.V. inhibitors that reduce surface temperatures. A series of solar panel tests indicate that artificial grass featuring TigerCool® technology successfully reduces turf temperatures by 30% and up to 17 degrees! That's a difference that you can feel.

Don't let the heat interfere with your life. TigerCool® makes any outdoor event a cool and pleasant experience. It's perfect for any front yard, backyard, commercial property, public park, or municipality. Like all of our turf products, it's safe for children and is pet friendly!

TigerCool® is now featured on the majority of our best-selling products. Our products are guaranteed to last while you cool your heels on our turf for years to come! Just look for the badge and experience the difference for yourself.
